NUTRITION TIP OF THE WEEK—FROM THE KSC FITNESS CENTERS: Approximately 15 to 20 million Americans work the night shift. Because of their schedules, workers on night shift often maintain inconsistent eating patterns and tend to have a harder time maintaining healthy nutrition habits. However, this is just as important for night shift workers, possibly even more important because of the additional stresses imposed by "fighting" the body's internal clock. Some tips for night shift workers to help them maintain a nutritious and well balanced diet include:

- Make healthy, not just convenient, food choices. Include a lot of fruits and vegetables and always have them available.
- For better digestion, eat smaller, more frequent meals instead of two or three large meals.
- Don't rely on caffeine to wake up or on sleeping aids to relax.
- Avoid sodas and drinks that advertise as "energy" drinks. They are full of sugar and the "pick me up" feeling is only temporary.
- Avoid vending machines and bring in: low calorie yogurts, rice cakes, sandwiches with lean meat, low calorie popcorn, canned tuna with crackers, and protein bars. (TA-C2)

EMPLOYEE ASSISTANCE PROGRAM: All employees are reminded that the Employee Assistance Program offers free, confidential counseling to all Kennedy Space Center and Cape Canaveral Air Station employees. Appointments are necessary to ensure adequate time. This program is available Monday through Friday, 7:30 a.m. to 4:00 p.m. Appointments may be made by calling 867-7398. (TA-C2)

LIGHTNING MYTH OF THE WEEK:

Myth: When Playing Sports And Thunderstorms Threaten, It's Okay To Finish The Game Before Seeking Shelter

Truth: **Sports is the activity with the fastest rising rate of lightning casualties. No game is worth a life or life-long severe injury. All people associated with sports should have a lightning safety plan and stick to it strictly. Seek shelter immediately when lightning threatens.** (TA-E2)
